

A Pearl Masters Kit From The Gods

By Jordan Liffengren Published May 5, 2010

Whether he's drumming in a rap, rock or pop band, Zeus X. Machina's Pearl Masters MMX kit in Emerald Fade is the perfect drum set for any genre.

A metalhead at heart, this German drummer plays in several different bands, so he has to have a kit that can transform from style to style.

"The left side of the drum set is used for all dynamical and 'quiet' stuff," Machina says about the massive kit. "The right side is mainly used for all 'loud' and metal stuff. The toms and effect cymbals can be used for a whole range of music."

Take a look at his [facebook](#) to see just how hard Machina rocks.
